

## Statement of Retraction: Priming with different doses of metoclopramide preceded by tourniquet alleviates propofol induced pain: A comparative study with lidocaine

We, the Editors and Publisher of *Egyptian Journal of Anaesthesia*, have retracted the following article:

Tamer Fayez Safan, Ahmed Abdalla Mohamed & Ahmed Shaker Ragab (2018). Priming with different doses of metoclopramide preceded by tourniquet alleviates propofol induced pain: A comparative study with lidocaine, *Egyptian Journal of Anaesthesia*, 34:3, 107–111, DOI: 10.1016/j.egja.2018.04.002

The above article has been retracted due to genuine mistakes made in the treatment of the data and in citing retracted articles which call the reliability of the presented results and the conclusions based thereupon into question. The authors have been informed of this decision.

We have been informed in our decision-making by our policy on publishing ethics and integrity and the COPE guidelines on retractions.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as "Retracted".
