

The role of retinoids in acute renal damage associated with acetic acid induced ulcerative colitis in adult male rats: Histological and biochemical study

In the article titled “The role of retinoids in acute renal damage associated with acetic acid induced ulcerative colitis in adult male rats: Histological and biochemical study”, published on pages 44–58, Issue 1, Volume 3 of Journal of Medical Histology^[1], the English title of the article was written incorrectly as “The role of retinoids in acute renal damage associated with acetic acid induced ulcerative colitis in adult male rats: Histological and biochemical study” instead of “Histological and Biochemical study of rat renal cortex in induced ulcerative colitis with evaluating the potential role of retinoids”.
