Abstract

Here write your abstract

Keywords: Type your keywords here, separated by semicolons ;

1. Main text

Here write your paper in sections (**Introduction, Related Work, Proposed Work, Results and Discussion, conclusion, and References**). Inside section use font (Times New Roman 10 pt) all section titles must be **Bold.**

1.1. Figures

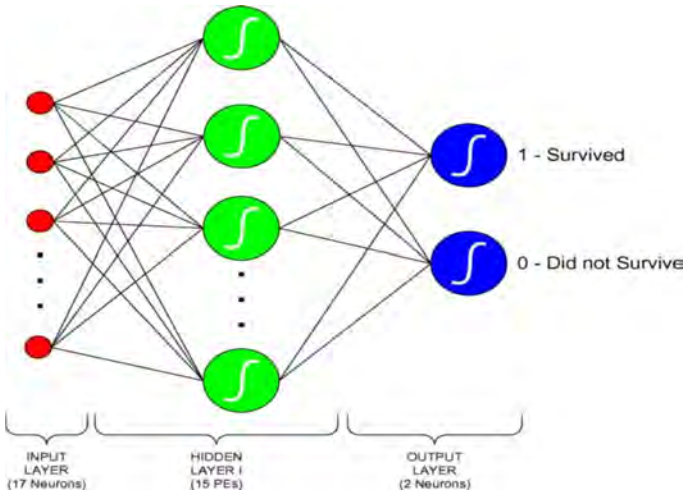

Fig. 1. Figure caption

1.2. Tables

All tables should be numbered with Arabic numerals. Headings should be placed above tables, left justified. Leave one-line space between the heading and the table. Only horizontal lines should be used within a table, to distinguish the column

headings from the body of the table, and immediately above and below the table. Tables must be embedded into the text and not supplied separately. Below is an example which authors may find useful.

Table 1. table caption

Col_1	Col_2
value	*value*
value	value
value	*value*

1.3. Equations

$$\mathrm{ri}' = r\mathrm{i} / \sum_{\mathrm{i}-1}^{mn} \mathrm{ri} \quad (1)$$

1.4. Algorithms

Algorithm 1

Inputs:

Write the inputs of your algorithm here.

Parameters:

Write your algorithm parameters here.

Output:

Write the output of your algorithm here.

Steps:

1- The steps of your algorithm must be written here
2-
3-
4- finish

Table of Contents(Vol. 11 Issue 1)

#	Title	pp
1	An Automated Contrast Enhancement Technique for Remote Sensed Images	1-16
2	A Modified Multi-Level Hyper Heuristic for Tackling Combinatorial Optimization Problems	17-29
3	Comparative Study of Intelligent Scheduling Algorithms for Heterogeneous Systems	30-43
4	A New Adaptive Cellular Genetic Algorithm for Mixed Variable Optimization Problems	44-61
5	Robust and Efficient ECG Classification with Privacy Preservation using LSTM+CNN and Adaptive Least Signal Bit	62-76
6	Long Short-Term Memory and Gated Recurrent Unit for Automated Deep Learning Prediction	77-86
7	A Review for Context-Aware Semantic Service Provisioning	87-97
