## **AIR PERFORMANCE CONFERENCE**

S. Shalash

### **ABSTRACT**

The purpose of this seminar is to highlight the need for an international programme that focuses on upgrading the performance of civil aviation organizations. The proposed programme promotes for performance management, the proper application of different performance improvement techniques and problem solving tools to enhance safety and business performance all over all types of civil aviation organizations (such as civil aviation authorities, airlines, airports...etc). The aim is to continually update and improve safety and business standards.
